Face Care

Rich and comprehensive care

With time, the skin on your face becomes dehydrated, lacking suppleness and elasticity, while your complexion loses its radiance. As a result, it becomes vital to provide it with the active ingredients that it requires. Each of your skin's specific needs must be paired with a corresponding and specially formulated high performance skin care product. Read the following pages to discover GERNÉTIC skin cares, based on a wide choice of products ensuring that you will always find a solution to your own needs.

It is time to react and place your trust in beauty professionals.

It's synchronising action reinforces them and accelerates the results.

Thanks to its active ingredients, SYNCHRO stimulates and maintains an optimum level of cellular renewal.

Make-up removal & cleansing

Pollution and sebum excess clog your skin's pores and tarnish your complexion. Even the best creams will have no effect on your skin if you are still wearing make-up. Your very first beauty routine to preserve a clear and luminous complexion is to thorough remove the make-up, without causing damage to the skin (avoid soaps with excessively acid PH balance). Once impurities are eliminated, your skin becomes suppler, refreshed and clean, ready to take in the superior action of our creams.

GLYCO

Use no more than once or twice a week on previously thoroughly cleaned skin. Apply with circular motions all over face, paying particular attention to the chin, nose and forehead (areas generally oilier than the rest of the face). Rinse off with lukewarm water.

Through its action, exfoliation helps purify and even out skin grain, preparing your skin to receive skin care creams.

FLOWERS ACIDS

New generation LOTION with FLOWER ACIDS. Contains AHA (alpha-hydroxy acids). Improves cells renewal by inducing highly effective and enjoyable exfoliant activity, without causing damage to the skin's cells.

At the correct concentration, alpha-hydroxy acids will:

- have moisturizing activity.

Les Parfaits by GERNETIC

Skin is not only a layer of protection. It is one of the body's highly important functional organ. In addition to its esthetic aspects including radiance, smoothness and skin tone, recent dermatological and cosmetological researches have demonstrated the importance of skin.

As a result, extra-cellular ENZYMES such as sphingomyelinases and glucosinases, are essential in order to guarantee the formation of ceramide bi-layers, which ensure proper cellular cohesion.

In addition, phospholipases regulate the cellular proliferation of keratinocytes.

Ceramidases, phosphatases, catalase and superoxyde-dismutase are involved in the skin's protection against free radical damage.

It is therefore necessary to protect the enzymatic functions of the Stratum Corneum.

Enzymes are the biochemical wheels of cells, hence Life itself.

A firm and toned bust

GERNÉTIC bust products: the result of years of researches. It brings the answers to the concerns of those anxious to keep their attractive bust, or to recover muscular tone and firmness and of those whose breasts are under and over developed.

The curve of your bust depends on the skin tone and on the supporting muscles. The breast is in fact supported by a "natural brassiere" or cutaneous girdle which determines its height and firmness.

The elasticity of this girdle, constantly subjected to the trials of pregnancies, weight losses and natural ageing, must therefore be maintained. To keep the aesthetics and beauty of your bust, you must start looking after it early.

SEINO

Tonic lotion for the bust

MACRO 2000

Balancing cream for the bust

The bust CARE and bust BALANCE are linked together with the overall good health of woman physiological system. We can not separate the BUST from the importance of nutrition and digestive system, all linked to the endocrinal system and overall good health.

The DEFICIENCIES of an industrial nutrition lead to many digestive disorders, which themselves cause nutritive deficiencies to our bodies. The BUST is particularly affected by this nutritional unbalance. The Laboratories Gernétic Synthèse (Labo.Ger.S) have created a technique to compensate for these deficiencies by percutaneous adsorption of ACTIVE INGREDIENTS developed from BIO-Technology. These NATURAL ACTIVE AGENTS synergise the Synthesis of the Metabolism of AMINO ACIDS, VITAMINS and TRACE ELEMENTS. Natur-Diet

FOOD SUPPLEMENTS

You cannot stay healthy if you do not get enough vitamins, trace elements (minerals) and amino acids. The body needs to be provided with all these in the diet every day to continue functioning properly. Unfortunately, the modern diet, which is largely dictated by the food processing industry, is providing less and less of these essential nutrients.

Therefore, supplementation of the diet is crucial.

Linking dietary complements to beauty treatments.

7 COMPLEXES OF DIETARY COMPLEMENTS for beautiful skin and easier care.

NATUR-DIET ACN

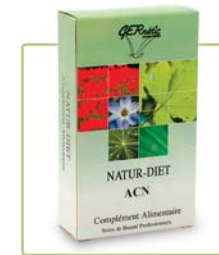

Skin blemishes are becoming more and more common. Closely linked with the consumption of food excessively rich (containing high levels of animal fats in particular) and/or sweet (refined sugar). The capacities of the digestive system (including the liver and gallbladder) become saturated resulting in cutaneous manifestations such as comedones (blackheads) or dilated pores.

NATUR-DIET CELLU

Many women develop "orange-peel" skin in early adolescence. This is the burden of "feminine" women. The principal causes are poor circulation and an unbalanced diet, so supplementation of essential nutrients is the most effective way of attenuating this unsightly problem.

NATUR-DIET STIMULE

Health and Beauty can never be separated. The skin needs to be able to defend itself against aggressive external factors like pollution, free radicals, pathogenic micro-organisms...

NATUR-DIET ZEN CONTROL

Modern life, constant uncertainty, the rat race, everyday worries, ... All can give rise to disquiet, anxiety and depression. Everybody's ambition should be a positive outlook because only such an optimistic attitude can pave the way for success in your enterprises.

NATUR-DIET FOOD CONTROL

Too much refined sugar (in sweetened drinks, cakes, biscuits and candy) and saturated fat (from dairy products, cold cuts and meat) throws lipid metabolism out of kilter. People grow fat and then find it difficult to lose the excess weight.

NATUR-DIET BUST

A beautiful bust is every woman's dream. The breast is intimately associated with both the endocrine system (hormones) and the ovaries so it is constantly being affected by all the stresses and insults of daily life such as smoking, drinking, hormonal imbalances, UV radiation and toxins. A natural diet will promote normal endocrine function and good breast metabolism.

NATUR-DIET JEUNESSE

Ever-lasting youth is a seductive dream. But unfortunately, ageing is an unavoidable fact of life. Still, the process can be controlled and slowed down if the body is allowed to carry on functioning as normally as possible. A balanced diet coupled with judicious skin care based on GERNÉTIC Int. and NATUR-DIET YOUTH will help you fight against everything which accelerates the ageing process like stress.

WELL-BEING

MEDUL

Used every day, this shower gel enhances your skin, leaves it revitalised and thus enables to slow down the effects of time.
