

Body Beauty Care

VEINULO "S" + VEINULO "Spécial" Plus

- **VEINULO "S" +** is a cellular stimulator specially designed for the restructuring of the walls of veins and capillaries damaged by poor blood circulation.
 - **VEINULO "S" +** boosts cellular respiration, by contributing to the transport of oxygen, and having a vasodilator effect on the capillaries, capillary fragility, varicose veins and central and peripheral circulation deficiencies.
 - **VEINULO "S" +** has anti-oxidant properties which act against polyunsaturated fatty acids, as well as an excellent moisturizing effect on the epidermal skin layers.
- The main cause of all problems related to poor blood circulation is an excessive intake of saturated animal fats (milk, butter, cheese, meat, etc.) and of refined sugars (sweet drinks, cakes, etc.) which saturate the digestive system and cause serious hepatic disorders.
- The **ACTIVE INGREDIENTS** are 100% natural and organic:
 - vitamin PP (vitamin B3);
 - vitamin E (alpha-tocopherol)
 - L. Lactic acid, polypeptides and glycopeptides with a molecular weight of between 1,000 and 5,000 daltons.
 - 8 amino acids, essential for good health and pleasing appearance.

● **VEINULO "S" +** should be used in the mornings (and/or in the evenings) in all cases of circulatory problems: varicose veins, visible capillaries, oedema, heavy leg, bruises, etc. Following an application of LYMPHO lotion, spray Veinulo "S" a few times all over the body, with particular attention to areas of imperfection. Rub in well, with gentle circular movements, before applying products specifically designed for body beauty care (Vasco Artéra, Adipo Gasta, Somito, etc.).

CELLULAR STIMULATION

for facial, bust and body beauty care.

The GERNETIC Int. laboratories, with over 32 years of experience in skin beauty care, have developed 3 new, high-tech organic products, designed to extend and boost the results of other regenerators and specialist products.

Research in Cellular Biology (the speciality of our Laboratories) continues to make great advances every year.

Extensive research has produced new NATURAL, ORGANIC ACTIVE INGREDIENTS.

At our Gernétic Int. Laboratories we test these active ingredients and develop new and better formulations to target the causes and effects of cellular ageing, as well as all the visible imperfections of the face, bust and body.

This has resulted in 3 exceptional products:

- **MITO "Spécial" Plus**, for facial beauty care
- **ENDO "Spécial" Plus**, for bust beauty care
- **VEINULO "Spécial" Plus**, for body beauty care

all specifically designed to act as: **CELLULAR STIMULATORS**.

Facial Beauty Care

MITO "S" +
MITO "Spécial" Plus

- **Mito "S" +** is a powerful cellular stimulant which enables better synthesis of natural collagen, thus offering a protective and reparative skin treatment.
- **Mito "S" +** is a growth factor which stimulates the epidermal keratocytes and the dermal fibroblasts.
- **Mito "S" +** helps to boost mitochondrial metabolism by increasing cellular respiration by 182% and by stimulating oxygen consumption at skin level.
- **Mito "S" +** has a significant anti-ageing effect but above all it serves to regenerate lifeless, tired skin, with a noticeable reduction in the coarseness, length and depth of wrinkles.
- The **ACTIVE INGREDIENTS** are 100 % natural and organic:
 - Glycoprotein, with a "Lectin"-like activity, stimulating cutaneous cell renewal;
 - Tripeptide, a messenger for collagen renewal;
 - 8 amino acids, essential for good health and pleasing appearance.

- **Mito "S" +** should be used every morning, with a few quick sprays all over the face.

Bust Beauty Care

ENDO "S" +
ENDO "Spécial" Plus

- **Endo "S" +** is a cellular stimulator of breast tissues. It regenerates the connective tissues by boosting their resistance and elasticity.
- **Endo "S" +** stimulates the synthesis of the dermal collagen by restructuring the elastic fibres, thus increasing the muscle tone and firmness of the breast tissues.
- **Endo "S" +** is used in all cases of sagging breasts (ptosis), but also for rebalancing the breasts to suit the patient's physiology (hypertrophy, atrophy).
- The **ACTIVE INGREDIENTS** are 100% natural and organic:
 - Horsetail extract, extremely rich in organic silica;
 - Bio-peptide: an essential peptide sequence for the renewal of collagen and of elastin;
 - 8 amino acids, essential for good health and pleasing appearance.

- **Endo "S" +** should be used after application of the Seino lotion. Apply a few quick sprays all over the bust, in the morning, 2 or 3 times a week. Rub in well, with gentle circular movements, until completely absorbed. Then apply Gernétic Int MACRO 2000 cream.
